

NEERAJ BHARTI

Data Analyst

github.com/erneerajbharti

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience designing, developing, and deploying interactive Business Intelligence solutions across the finance, manufacturing, e-commerce, and education sectors. Skilled in Power BI, Tableau, SQL, and Python, with strong expertise in data modeling, DAX, Power Query, and ETL processes. Proven ability to partner with cross-functional teams to transform raw data into actionable insights that drive strategic, data-informed business decisions.

TECHNICAL SKILLS

- **BI & Visualization:** Power BI, Tableau, Qlik, Looker, Alteryx
- **Programming & Query Languages:** Python, SQL, DAX
- **Data Analysis:** Data Modeling, Power Query, ETL, Forecasting
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, scikit-learn
- **Tools & Platforms:** Advanced Excel, Git, Docker, SQL Server, VS Code, Google Colab

PROFESSIONAL EXPERIENCE

Data Analyst

Jun 2026 – Present

BizBrolly Solutions Pvt. Ltd.

- Build and maintain Power BI and Excel-based dashboards for internal product and client delivery projects across healthcare, SaaS, and government/NGO sectors.
- Perform data extraction, cleaning, and analysis using SQL and Python to support product and project reporting needs.
- Collaborate with product management and client-facing teams to translate business requirements into data models and visualizations.
- Support ad-hoc analysis and reporting automation to improve turnaround time on stakeholder requests.

Assistant Manager, Data Analytics

Jan 2025 – May 2026

Uni-Com Group of Companies – Fincorp | NBFC

- Automated financial dashboards for disbursements and sales in Power BI, enabling faster, data-driven strategic decisions for leadership.
- Analyzed foreclosure, overdue, and repayment trends to generate risk insights supporting credit risk management.
- Built sales and login dashboards to track funnel performance, productivity, and growth across teams.
- Partnered with cross-functional MIS teams to ensure data accuracy and consistency across reporting systems.
- Delivered ad-hoc analysis, forecasting, and performance monitoring.

Data Analyst (Freelance)

Jan 2022 – Dec 2024

Manufacturing & E-Commerce

- Developed and maintained Power BI dashboards to visualize data trends and support stakeholder decision-making.
- Analyzed user consent preferences within the Concur Consent Manager framework to support compliance and data governance reporting.
- Collaborated with stakeholders to define and document data analysis requirements for consent management initiatives.
- Applied analytical tools and techniques to extract actionable insights from large, complex datasets.

Analyst, Operations

Feb 2016 – Sep 2021

Core Integra Consulting Services, Mumbai, Maharashtra | Project: Tata Consultancy Services iON

- Aggregated data from digital learning platforms and assessment tools, implementing validation processes to ensure data integrity and accuracy.
- Conducted comprehensive data analysis to uncover trends and insights supporting decision-making across educational and government sectors.
- Built detailed reports and dashboards using Excel, Tableau, Power BI, and TCS iON's proprietary analytics tools.
- Presented data insights and findings to stakeholders, facilitating informed, data-driven decisions.

PROJECTS

Airbnb Exploratory Data Analysis & Netflix Content Clustering (Python)

[Project Airbnb](#) | [Project Netflix](#)

- Analyzed Airbnb pricing and booking trends using Pandas, NumPy, Matplotlib, and GeoPandas to uncover patterns across neighborhoods and listing types.
- Performed data cleaning and feature engineering on raw listings data to handle missing values, outliers, and categorical variables.
- Built clustering models (K-Means, DBSCAN, Hierarchical) with NLTK and t-SNE for Netflix content segmentation and recommendation.
- Applied natural language processing on content metadata to group titles by genre, theme, and audience similarity.
- Visualized cluster outputs and pricing trends through charts and dimensionality-reduction plots to support interpretation.

Indian Startups Dashboard (Power BI, Tableau)

[Link to Dashboard](#)

- Designed interactive dashboards analyzing India's startup ecosystem, enabling users to explore funding trends across years and stages.
- Built data models connecting funding rounds, investors, and sectors to enable drill-down analysis.
- Visualized sector distribution and geographic hotspots to support investment and policy decisions.
- Created slicers and filters for city, sector, and funding stage to make the dashboard self-serve for end users.
- Summarized key insights and trends in an executive-view page for quick decision-making.

Road Accident Analysis Dashboard (Power BI, Data Modeling, DAX)

[Link to Dashboard](#)

- Built an interactive Power BI dashboard analyzing road accidents by conditions, lighting, road type, and vehicle type.
- Designed a normalized data model and DAX measures to calculate accident rates, severity trends, and time-based patterns.
- Surfaced geographic hotspots using map visuals to highlight high-risk zones for targeted intervention.
- Analyzed the impact of factors such as weather, lighting, and road type on accident severity.
- Enabled stakeholders to filter by region and time period to support road-safety planning and reporting.

EDUCATION

Bachelor of Technology, Computer Science & Engineering <i>Lovely Professional University, Phagwara, Punjab</i>	2015
Full Stack Certification, Data Science & AI <i>Indian Institute of Technology (IIT) Guwahati, Assam</i>	2024
